

Have your say about...

Children and Young People's Mental Health and Emotional Wellbeing

Healthwatch Worcestershire finds out what people think about health and care services. We use this information to tell those who run the services how they can be improved.

We want to find out what young people, parents and carers think about mental health services, especially the Child and Adolescent Mental Health Service (CAMHS) in Worcestershire.

We want to know about experiences of accessing CAMHS and other support available for mental health and emotional wellbeing.

We are running surveys that can be accessed online, via our website or these links -

Survey for Young People (age 16 and over) who have accessed or tried to access CAMHS or support for mental health issues in the last two years

Survey for Parents and Carers who have a child or young person who has accessed or tried to access CAMHS or support for mental health in the last two years

We have paper copies available for distribution and we are also happy to visit groups to bring along surveys and talk to people about their experiences.

Please contact us for more information -
